Abstract (en)

[origin: WO2004022691A1] Disclosed is a liquid detergent or cleansing agent composition which is supplied in a portioned manner in a water-soluble or water-dispersible container and comprises a matrix having a low water content and phosphate that is dispersed therein. Said liquid detergent or cleansing agent composition has an increased storage stability and a lower tendency to precipitate and solidify if the dispersed phosphate comprises sodium tripolyphosphate and the phase I proportion of the dispersed sodium tripolyphosphate is less than 25 percent by weight relative to the total weight of the dispersed sodium tripolyphosphate.
