Abstract (en)
[origin: WO2004015343A1] The invention relates to a refrigerator door (1), comprising an inner cladding, an outer cladding (3), at a separation therefrom and two border elements (4), which enclose a cavity together with the inner and outer cladding (3). Said cavity is filled with thermal insulation material. Fixing means (6) are provided on each of the border elements (4), for fixing a cladding (23), arranged in front of the visible side of the outer cladding (3) and covering at least the majority of the visible side.
