Abstract (en)  
[origin: WO2004021051A2] The invention relates to a display device, comprising a display layer (2) and a touch-sensitive layer (3), running parallel to the above. Said display devices are characterised in that an anti-reflection grating is provided, arranged on the touch-sensitive layer (3), whereby the grating elements may be displaced relative to each other or have a touch-sensitivity, which is independent of other grating elements.
