Abstract (en)

[origin: EP1529750A1] Machine for sealing containers such as bottles, cans, etc. with screw-type caps has several sealing positions arranged along the periphery of a rotor rotating about a vertical machine axis. Each sealing position has a container carrier, a container support (1), and a screw unit provided at its lower end with a screw head. The container support is equipped with elements that reliably separate the screw-type cap and the screw head. Preferred Features: The elements comprise at least one holding-down device (7).
