Abstract (en)

The method involves back filling a volume of a pressurized liquid in a pipe (C) and interrupting the back filling. Another volume of pressurized liquid is back filled within 5 seconds at end of back filling of the former volume and is interrupted. A third volume of pressurized fluid is back filled within 5 seconds at the end of the back filling of the latter volume. The back filled liquid occupies entire section of the pipe.

Abstract (fr)

Dans ce procédé de curage d'une canalisation C, on refoule par un groupe motopompe 5 à 8, une première quantité d'eau, puis quelques secondes plus tard, on refoule dans la canalisation C par le groupe motopompe 5 à 8 une deuxième quantité d'eau. <IMAGE>
