Abstract (en)

Refrigeration apparatus comprising two doors arranged side by side or on top of each other, a common support plate for two hinges for said doors provided on an outer wall of the apparatus, and at least a bolt applied in a slot-shaped hole provided in said common support plate, in which between said support plate and said wall there is placed a spacer made of a deformable material and provided with a through-hole for said bolt. In said deformable spacer there is provided a second deformable and projecting bush at the place where said through-hole is located in the spacer, said bush being so sized as to be able to be substantially inserted in the respective slot-shaped hole of said support plate. <IMAGE>
