Abstract (en)

[origin: EP1529945A1] The invention relates to a method for controlling fuel injection in a vehicle combustion engine comprising at least one combustion chamber and means for supplying fuel into the combustion chamber. The invention is characterized by the steps of detecting a first signal comprising information indicating a desire to start the engine and controlling fuel supply to said combustion chamber in dependence of a second signal, said control being performed before the engine is cranked up by a starter. <IMAGE>
