Abstract (en)

[origin: EP1530016A2] Heat exchanger (10) comprises guiding elements (22, 24) extending up to the region of an inlet (18) and an outlet (19). The cross-section of the inlet and the cross-section of the outlet fit the delimiting walls of the guiding elements and run flush with them. Preferred Features: The guiding elements arranged in the region of the inlet and outlet each have a guiding wall with a middle point which is aligned to the cross-section of the inlet and outlet. A supporting element (21) forms a insert unit (20) together with annular segments (26).
