Abstract (en)

[origin: WO2004016190A1] The aim of the invention is to simplify a method for the production of dentures made of pressed ceramics in the field of dental technology, comprising the following steps; producing a muffle, introducing the muffle into the dental ceramic press furnace, heating a ceramic pellet and pressing a press ceramic object. A free area (25) is formed on the base of the muffle (50), which allows thermal radiation to pass through. The invention also relates to a corresponding dental ceramic press furnace and an associated muffle.
