Abstract (en)  
[origin: FR2843819A1] The device consists of a configuration unit (26) used to authorise the operation of the device in the presence of the security device, the configuration unit comprising the recording of a public identifier (V) for the security device in the storage unit (20) of the electric device. There is a unit (28) for identifying at least one security device when the electric device is connected to any network (10) comprising one such security device, and a unit (30) for inhibiting the electric device (14) if the security device identified does not correspond to the security device (12) for which it has been configured or if the network does not comprise a security device.
