Abstract (en)
The binding has a front strap (10) rotating with respect to a base plate (2) at pivot points (11) that are perpendicular to a median longitudinal plane. A strap (6) has a bump, at its end, cooperating with a toe piece (25) integrated to the plate. A hole (17) in the strap (10) is in contact with an upper side of the toe piece to limit the backward rotation of the strap (10) with respect to the base plate.

Abstract (fr)
Fixation de surf des neiges (1) comportant une sangle (10) destinée au serrage de la partie avant du pied, ladite sangle étant apte à pivoter par rapport à un axe (11) sensiblement perpendiculaire au plan longitudinal médian de la fixation. Elle se caractérise en ce qu'elle comporte des moyens pour limiter le pivotement de ladite sangle (10), par rapport audit axe, en direction de l'arrière. <IMAGE>
