Abstract (en)

The membrane (1) for closing containers in general, comprising a body (2) of elastic material defining a portion (3) for its retention on said container (4) and a portion (5) for closing this latter. The membrane comprises a valve (6) associable with a vacuum pump or aspirator (25) for discharging the air contained in the container (4) to the outside. The food product preservation device comprises a container (4) to receive the food products (26) and a lid (27) for their protection. The device also comprises the membrane (1) interposable between the container (4) and the lid (27). <IMAGE>
