Abstract (en)
Driving rod fitting (3) for locking a leaf (2) in a frame (1) of a window, French doors, etc. comprises a longitudinally guided driving rod (6-8), several lock elements (10-12) driven by the driving rod, and at least one lock plate (13-15) for receiving the lock elements in a locked position. Two adjacently arranged lock elements are fixed to different driving rods. The driving rods are interconnected via coupling elements (16, 17) that are designed so that when the first driving rod is driven, the second driving rod is driven in the opposite direction.

Abstract (de)
Bei einem Treibstangenbeschlag (3) zur Verriegelung eines Flügels (2) in einem Rahmen (1) sind auf einem Flügel (2) mehrere Treibstangen (6 - 8) gegenläufig zueinander geführt. Auf den Treibstangen (6 - 8) sind jeweils Schließelemente (10 - 12) befestigt. Die Schließelemente (10 - 12) bewegen sich durch die gegenläufige Führung der Treibstangen (6 - 8) aufeinander zu oder voneinander weg in auf dem Rahmen (1) angeordneten Schließblechen (13 - 15). <IMAGE>
