Abstract (en)
The small item holder for a refrigerating appliance has a standing surface (2), a side wall (5) in which at least one slot (6) is formed, and a holding frame (10) which is fixed by the slot at a selected distance above the standing surface. A toggle is formed on the holding frame and in a first orientation is guided into the slot, and in a second orientation is rotatable in the slot where it lies against the rear side of the side wall. An independent claim is included for a domestic refrigerator door equipped with the proposed small item holder.
