Abstract (en)
[origin: WO2004012044A2] A method for receiving page-specific user feedback concerning a particular web page of a website includes using a comment icon viewable on the page to solicit one or more page-specific open-ended comments concerning the page from a user. In one embodiment, the method includes using software associated with the comment icon to automatically communicate a request for a comment window to a remote computer system that is separate from a computer system hosting the website in response to the user selecting the comment icon, receive the comment window from the remote computer system, present the comment window to the user, and receive one or more page-specific open-ended comments concerning the page from the user provided using the comment window for reporting to a website owner. In another embodiment, the method includes using software associated with the icon and incorporated into a computer system of the user for purposes of research concerning one or more particular web pages to determine a page identifier of the page in response to the user accessing the page and receive the page-specific user feedback concerning the page from the user for reporting in association with the determined page identifier of the page to an entity sponsoring the research.
