Abstract (en)
Dishwashing machine provided with a washing vessel (1) and comprising one or more of the following devices: a filter arrangement (5) for straining the washing liquor, a salt reservoir (3) for holding the salt needed to regenerate water-softening substances, a rinse aid dispenser (40), a washing aid dispenser (30), at least a rotating spray arm (4), in which there are provided one or more light indicator means (9,25,33,43,55), each one of which is applied on a respective device, or in close proximity thereof, said machine being provided with means adapted to supply said light indicator means (9,25,33,43,55) with respective signals depending on and indicative of the operating state of the corresponding device. According to definite variants in the embodiment of the present invention, said indicator means (9,25,33,43,55) constitute the terminal portions of respective light guides that are adapted to receive the light being generated inside the machine itself. Preferably, the light emitted by said indicator means is variously modulated in its intensity and can take different colours. <IMAGE>
