Abstract (en)  
[origin: EP1533196A1] In order to provide a technique of constructing an airbag system (100) for completely protecting an occupant (C) in the event of a car accident, an airbag system (100) to be mounted to the upper part of the sidewall of a vehicle includes an airbag (120) in which a first bellows portion (121) folded like a bellows, a rolled portion (122) wound up in a roll such that the projection (122b) of an inflated folded portion (122a) faces the vehicle sidewall, and a second bellows portion (123) folded like a bellows are disposed in this order. <IMAGE>
