Abstract (en)

[origin: EP1533221A1] The device has a swiveling and movable platform, and a vertical pivot. The pivot comprises an axle positioned vertically under the platform and a soleplate bolted under the platform. A chain guide, a davit, and a rotation device for rotating the platform around the vertical axle of the pivot are fixed on the platform. The platform is immobilized in a desired position using a blocker push button.
