Abstract (en)

[origin: EP1533457A1] The window (1) or door has a fixed frame (2) and at least one swing panel (3) rotating around an axis (4). The panel is mounted to the frame by a pantograph structure (7), with linked arms (8,9) in the closed position between the rabbet surfaces (15,32) of the frame and the panel, For an opening swing movement, the linked arms move on their joints (10-12,14) in a parallel movement with the rotary axis, across the main plane of the fixed frame.
