Abstract (en)

[origin: EP1535668A2] The device for the one-sided or two-sided application of several fluid or paste-form media (17,18,19) on a moving surface has a curtain application system with a curtain delivering media to the subject surface and with a nozzle (10) provided with chambers (11-13) located next to each other along the width of the moving surface. The chambers of the nozzle are equipped with fixed or movable partitions (14,15) which have tapering end sections (16).
