Abstract (en)

[origin: EP1535858A1] The pallet-like underframe for the storing and transporting of liquid containers has anti-slip support elements (39) fitted on the underside (32) of the bottom (13) of the underframe (12), by which the bottom of the underframe during the transporting of a container lies upon the gripping arms of a transporting means. The manufacturing material of the support elements of the underframe's bottom and the manufacturing material of the gripping arms are matched to one another to achieve the largest possible friction coefficients.
