Abstract (en)
[origin: WO2004009454A2] A locking aerosol dispenser is disclosed having an actuator rotatably secured to the aerosol container. The actuator is rotatable into a first rotational position for enabling an actuator to discharge an aerosol product from the aerosol container. The actuator is rotatable into a second rotational position for inhibiting the actuator from discharging the aerosol product from the aerosol container. The actuator may be incorporated into an aerosol overcap or an aerosol undercap.
