Abstract (en)  
[origin: WO2004022839A2] The invention relates to a formulation which is used to rinse textile fibre items in a hydroalcoholic or aqueous medium. The inventive formulation consists of active matter comprising a liquid or solid hydrophobic organosilicon or organic material in particulate form, a surface active agent and a carrier comprising a water-soluble organic polymer, which can convey the active matter towards the surface of the textile fibre items during rinsing.
