Abstract (en)
[origin: WO2004023287A2] Methods and apparatus, including computer program products, for sharing data. The technique includes receiving data in a central system from one or more client systems, performing a matching process on objects of data in the central system to determine if there are similar objects in the central system, mapping object identifications of similar objects to each other if there are similar objects in the central module, and providing the object mapping information to a process.
