Abstract (en)

[origin: WO2004025597A1] The invention relates to a composite security system against unauthorised access by damaging the object or objects to be secured, and to a method for the production thereof. The invention is based on a multi-layered system which is connected to the object or objects to be secured or which is integrated therein. The inventive composite security systems can be used in a variety of ways to protect mobile or immobile objects from unauthorised access.
