Abstract (en)

[origin: EP1538096A1] The assembly has a marker (108) at its rear and front longitudinal ends for controlling an orientation of the assembly during installation on a film constituting the body of sachets. Two profiles (102, 104) comprise complementary units (103, 105) respectively for closing and opening the sachets to accesses contents in the sachets. The profiles are carried by two support covers that are parallel to each other. Independent claims are also included for the following: (A) a sachet including a clasp assembly (B) a sachet manufacturing process.
