Abstract (en)
[origin: EP1538102A1] The packaging consists of a mainly flat lower part (2) with holder (6) for a primary package (7), e.g. a pot (8) for a dessert, and a hood-shaped upper part (4). The upper part has at least two inward projecting stops (11) for each pot. After upper and lower parts have been connected, the stops are located above the edge of a pot for definition of height. There are at least two diametrically opposite stops for each pot, and the upper part has stepped recesses to define stops (11) for neighboring primary packages.
