Abstract (en)
[origin: EP1538286A1] The cylinder has a stub (106) projecting onto a front face (102) of the cylinder in a rest position (108), and projecting with respect to the front face in an operating position (110). A magnetic field generator is adapted to maintain the stub in the two positions. A rear face of the cylinder is provided with a hole adapted to a form of a European triangle. A surface of a key contacts with the front face of the cylinder. An independent claim is also included for a door including a cylinder and a key.
