Abstract (en)  
A combustion head (100) for premix burners. The head (100) has a cylindrical body (101) having a number of holes or openings (102), through which the fuel gas/combustion air mixture flows from an inner space (106) of the cylindrical body (101) to a combustion region (104) outside the cylindrical body (101). The combustion head (100) also has at least one partition (105a, 105b) for dividing the inner space (106) into a number of longitudinal sectors (106a, 106b, 106c, 106d). <IMAGE>
