Abstract (en)

The dial has a ceramic substrate (1) whose outer surface has two enamel layers (3) and inner surface has an adhesive film (5). A thick metallic layer (7) is deposited on the film, to fix a steady-pin (9). A head (11) of the pin is fixed on the layer (7), by sticking, welding or soldering. The inner surface has a cylindrical housing to position the steady-pin. An independent claim is also included for a method of manufacturing an enameled dial with a steady-pin.

Abstract (fr)

Le cadran est réalisé à partir d'un substrat (1) en céramique dont la surface externe est revêtue d'une à deux couches d'émail (3) et dont la surface interne comporte un film d'accrochage (5) permettant le dépôt d'une couche métallique (7) plus épaisse pour la fixation de la tête (11) des pieds (9) par collage, soudage ou brasage. <IMAGE>
