Abstract (en)
[origin: WO03084453A1] The salt chamber for carrying out the therapeutical procedure characterized by that it has walls (1), the ceiling (2) and floor (3) which is built of natural not-purified salt bricks. The bricks have such thickness which enables the laminary flow of the pressed filtered air from the room (7) through the walls (1) from outside to the interior of the chamber (5). The room (7) preferably is closed and has inside the chamber (5) and the floor (3) of the chamber (5) is covered with large grains in bulk (8) of natural not-purified see salt, wherein the chamber (5) has the special equipment for stabilising the temperature (11), light (12) and sound (13).
