Abstract (en)  
[origin: WO2004000479A1] The invention relates to a guide support for a tube-bending machine (1), comprising a baseframe (2), a bending head (3), a bending arm (4), a bending roller (9), a locking jaw (12) for bending of a tube (5) and sliding means (15, 16) for the displacement of the bending head (3) in the horizontal and vertical directions with relation to the baseframe (2), comprising at least two guides (28, 29), the recesses (30, 31) of which are arranged in opposing directions with relation to the position of the tube (5) for bending and guiding and displacement means (18, 19, 23, 24) for the guides (28, 29) on the bending head (3).
