Abstract (en)

[origin: WO2004007158A1] The present invention relates to a method for the manufacture of a perforated nonwoven (2), whereby perforation means engage into the nonwoven. The perforation means are arranged on a first roller (8). The perforation means engage through the nonwoven into a surface (15) of a second roller (10). The perforation means displace fibres of the nonwoven, whereby the perforation means engage in a material on the second roller (10), such that said means can displace the material when they engage. In addition, a corresponding device and corresponding materials are provided for.
