Abstract (en)
[origin: WO2004027096A1] The invention relates to a stuffing agent comprising A) a mixture of modified native oils containing a1) at least one oxidized sulphitized native oil and a2) at least one oxidized sulphatized native oil, B) an emulsifier mixture containing b1) at least one C6- C14- alkanol which is alkoxyated with 4 - 12 alkylene oxide units, b2) at least one C12- C24-alkanol which is alkoxyated with 15 - 40 alkylene oxide units and b3) at least one C12- C24-alkanol which is alkoxyated with 50 - 100 alkylene oxide units, in addition to C) optionally one linear, cyclic or branched polymer of dialkylsilandiol SiR₂(OH)₂, wherein R represents methyl, ethyl, n-propyl or phenyl, and/or D) optionally one compound of general formula (II), wherein R<1> and R<2> are identical or different and are selected independently from each other from the group consisting of H, M, saturated linear aliphatic C1- C18-alkyl and saturated branched aliphatic C3- C18 alkyl, wherein at least one of the two radicals R<1> and R<2> H, M with M = alkali metal, 0.5 alkaline earth metal, and M+ is selected from the group of H+, NH₄+, alkali metal+ and 0.5 alkaline earth metal +. The invention also relates to the use of the inventive stuffing agents in the production of leather and/or in the treatment of leather with aqueous dispersions of said stuffing agents.
