Abstract (en)

The frame has a main frame (1), and a secondary frame (2) extending from the main frame in a longitudinal direction. The main frame has bases (7, 8) rotating between a deployed position and a receding position. The secondary frame, a support leg (5) and the bases form a deformable articulated structure, such that the bases and the leg are folded between the two frames, when the secondary frame is folded under the main frame.

Abstract (fr)

L'objet de l'invention est un cadre de sommier à lattes comportant un cadre principal (1) et au moins un cadre secondaire (2) caractérisé en ce que le cadre secondaire (2) prolonge le cadre principal (1) dans une direction longitudinale et est solidarisé par une charnière (3) à une traverse (4) du cadre principal, de sorte que le cadre secondaire (2) puisse se replier sous le cadre principal (1). <IMAGE>
