Abstract (en)
The transporter (1) has a spreader (15) placed on a freight container (3). This has a foot print corresponding to that of a standard container, and the spreader does not project over the sides of that footprint when in transport position. The container has four corner posts (12) and the spreader is supported on the posts and engages into recesses in the posts with lockable holder elements. The transporter is enclosed on all sides by a tarpaulin, which is supported on longitudinal bars (6,7). The container has fastener devices (17,21,22,23) for additional components of a crane.
