Abstract (en)
[origin: EP1541770A2] An anchoring assembly for anchoring a structure to the ground, comprising an anchoring pile (2) having a rotatably drivable shaft (3) which is provided at least at its free end with a ground drill element (4) for screwing the anchoring pile (2) into the ground, and an elongate foundation element (8) which can be moved into the ground, in which the shaft (3) of the anchoring pile (2) is rotatably connected to the foundation element (8), extends substantially in the longitudinal direction of the foundation element (8) and, together with the drill element (4), extends at least partially as far as under the foundation element (8).
