Abstract (en)
[origin: EP1541795A2] The device has an energy storage device (7) for supplying the actuator (3), a receiver unit (2) for contactless reception of a control signal and a control unit (8) for feeding energy to the actuator depending on the control signal. Energy for charging the energy storage device can be delivered via the receiver unit. The energy fed to the receiver unit is converted into a voltage. Independent claims are also included for (A) a system with a transmitter, a controller and an actuator (B) and a method of triggering an actuator.
