Abstract (en)
[origin: EP1542256A2] The device consists of at least one clip element (34) or main clip with an annular supporting surface as a peripheral flange (36) with inner and outer edges, a preferably cylindrical side wall (37) whose free end forms a terminating cover (38) with an opening (40) matching the section of the bulb to be fixed and especially with an arrangement for a twist protection mechanism. An independent claim is also included for an electric lamp with a single base.
