Abstract (en)

[origin: EP1542321A1] The appliance has a fixed connector (1) and a cartridge, each with a keying unit. The keying unit (27) of the connector has a hub, arms and arches. Each arch is convex towards outside and is connected to the hub through the arms. Each arch is deformable and can be bent elastically towards the hub in a space between the hub and arms since angular orientation of the unit (27) is selected in an assembled state of the connector.
