Abstract (en)
[origin: FR2844432A1] A waterproof case for mobile electronic devices of variable geometry. The case comprises a cover comprising an opaque rear face, a front face comprising an opening an upper part, an open lower part, first and second lateral parts, one of which supports a longitudinal fold in the cover. The upper and second lateral part comprise a weld proof against moisture, weather, shock, dust, scratches and splashes. The opening in the front face contains a transparent window fixed to it in an impermeable manner. A flap fixed to the bottom of the front face acts as an impermeable closure. The cover further comprises a finger like excrescence on its upper part. The flap comprises a splay intended to fit around the lower part of the cover to give a secure closure and a tongue intended to be applied to the rear face to maintain the closure.
