Abstract (en)

The comb has a line (4) of teeth (2, 3) extending along X axis. Teeth (3) carry longer hooks (5) that extend outside a plane defined by the teeth (2, 3), while teeth (2) are devoid of the hooks. A handle (6) elongates along a longitudinal axis that is perpendicular to the X axis. The teeth (2, 3) extend parallel to the longitudinal axis of the handle. The hooks extend laterally towards same lateral ends (9) of the comb. An independent claim is also included for a method for coloring or bleaching hair mesh.

Abstract (fr)

La présente invention concerne un peigne pour les cheveux, comportant une succession de dents, l'une (3) au moins portant un crochet (5) qui s'étend au moins partiellement hors d'un plan défini par au moins deux dents (2, 3) de la succession, et au moins deux dents étant dépourvues de crochet. <IMAGE>
