Abstract (en)
A printer device (1) provided to contain a printer head (15) and a ticket paper roll and comprising an opening means (7) and a base frame (2) to which a cover (4) is hinged. The printer device comprises an opening means (7) being pivotally mounted around a pivot axis (a), which is substantially perpendicular to a lever arm axis (b) of said opening means. Particularly, the opening means is a push button (7) comprising a head plate located on one side of said pivot axis (a) in front of said cover (4) when the latter is in closed position, said push button (7) further comprises a snug (8) located on another side of said pivot axis (a) and provided to contact said cover (4) when in closed position. <IMAGE>
