Abstract (en)

[origin: EP1544153A2] The single line hook block for lifting tackle has a rotatable cable deflection device (2) and a suspension (3) for a load hook (4) which are interconnected by two parallel disposed tie rods (5a,5b). At least one of the tie rods forms a pivot (18) for the cable deflection device. The two tie rods are interconnected by threaded connections to form a longitudinally split tie rod component, with stub axle type extensions (18a,18b) on the facing sides which when the two tie rod sections are screwed together form the pivot for the deflection device.
