Abstract (en)

[origin: EP1544398A2] The control device includes a release mechanism actuated by the standing casement and provided with a release slider (15) which to actuate the locking device (11) transfers movement of the slider (8) of the door drive into a movement of the release element (14). The release slide has a lift incline (22) sloping to the path of movement of the slider (8) to interact with the latter to move the release slider.
