Abstract (en)  
[origin: WO2004023943A1] A textile, particularly a blanket, preferably a quilt, comprises a bulky filling (2) enclosed by a cover (1). In order to ensure that a textile of this type has a good thermal insulation, a high passage of moisture therethrough, and a good low-cost recyclability, both the cover (1) as well as the filling (2) comprise Lyocell fibers, whereby the cover (1) is provided in the form of a nonwoven, and the filling (2) is provided in the form of a high loft nonwoven or of fiber balls or in the form of Lyocell fibers that are placed inside the cover (1), for example, by being blown in.
