Abstract (en)
[origin: WO2004028487A2] The invention relates to a cosmetic composition comprising, in a cosmetically-acceptable organic liquid medium, at least one film-forming linear ethylene block polymer and another film-forming agent. The aforementioned film-forming agent can be dissolved or dispersed in the organic liquid medium. The inventive composition can contain an aqueous phase, in which case the film-forming agent can be dissolved or dispersed in the aqueous phase. The invention also relates to the way in which the combination of one such block polymer and a film-forming agent can be used to improve the performance of said composition on keratinous materials.
