Abstract (en)

[origin: WO2004012677A2] This invention provides a method to inhibit neovascularization in tissue by delivering to the cell or tissue an effective amount of sulforaphane, or a pharmaceutically acceptable salt, derivative or prodrug thereof. Also provided herein is a method for treating a disease associated with hyperproliferation of endothelial cells and/or neovascularization by administering to a subject an effective amount of sulforaphane, or a pharmaceutically acceptable salt, derivative or prodrug thereof. Kits to treat patients are provided as well.
