Abstract (en)
[origin: WO2004031046A2] A container, consisting of a container body and a lid connected to it, the container body and lid being manufactured separately, characterised by the fact that the container body has a recess or projection in or on its outer wall adjacent to its dispensing aperture, and the lid has a connecting land extending outwards from its peripheral rim, with a projection or recess provided at the end of the land distal from the lid, which can be brought into engagement with the recess or the projection on the container body.
