Abstract (en)  
[origin: WO2004005643A1] The present invention relates to a mineral bonded Wood Strand Cement (Magnesite, Gypsum) Board which is produced from a mixture of wood strands or a similar fibre material, water, a suitable binder like cement, magnesite or gypsum, and possibly additives, which mixture is cured under pressure to form a board with a practically entirely closed surface. For the boards according to the invention, wood strands are being used that are broader and wider than used until presently in acoustic Wood Wool Cement (Magnesite, Gypsum) Boards. Moreover, the invention relates to the production process for the production of such Wood Strand Cement (Magnesite, Gypsum) Boards.
